Energy Auditing for the Water and Wastewater Systems of Georgia

FREE Energy Efficiency Audits

(For populations 10,000 or less)

The Energy Efficiency Technical Assistance Program is designed to promote energy efficient practices in small water and wastewater systems. **There is no charge for the program.** The program consists of performing energy assessments, recommending energy-efficient practices and technologies, and providing support in achieving recommendations. Technical support includes operational assistance, assisting with presentations to governing boards, accessing financing, training, and developing documentation.

Because energy is one of the largest costs for utilities, the program is expected to have substantial impact on operating costs, financial sustainability, and product affordability. We set a goal of at least 15% improvement in energy efficiency and prioritize assessments toward utilities that are in the greatest need.

Our Energy Audit Includes:

- Utility Bill Analysis
- Estimated Energy Consumption for Seasonal Variations and Inclement Weather Events
- Inventory and Analysis of Major Equipment Energy Consumption
- Evaluation and Recommendations on Alternative Operation Strategies
- Lighting Upgrades (where applicable)
- Estimated Annual Savings
- Comparison with Industry Benchmarks
- Additional Energy Savings Tips

Contact GRWA Energy Efficient Specialist - Dennis Brown, so he may assist your facility in conserving energy and recovering \$\$\$\$. Dennis Brown Cell: 678-750-3886 - Email: dbrown.grwa@gmail.com
