

Introduction to Cybersecurity: Workshop and Response Exercises

Macon, GA – December 4, 2019

Cybersecurity threats are real and they are here to stay. For example, in Riviera Beach, FL, a city employee opened an email that infected the city's systems, including those that controlled their water utility pumps. So what can be done about this threat?

To help answer that question, the U.S. EPA is sponsoring a free, one-day workshop with response exercises to inform water utilities about the cyber threat, ways to manage the threat, and tools (such as AWWA's cybersecurity tool) available to help utilities. In addition, current results from several Virginia water-works cyber assessments will be presented to share lessons learned.

In the afternoon, facilitated response exercises will be conducted presenting realistic cyber threat scenarios, allowing all participants to talk through the actions they would take in response to the threats. The goal is to identify general planning or procedural actions that enhance cybersecurity and mitigate risk.

This workshop is intended for utility information technology staff and utility managers. Register online www.grwa.org click on the GRWA Training tab. For questions, please call the GRWA office at 770-358-0221 or email grwa1@grwa.org

Location: Marriott Macon City Center

240 Coliseum Dr, Macon, GA 31217

Date: Wednesday, December 4, 2019

Time: 8:00 am—5:00 pm

Lunch Provided

Approved for 6 CE Points for Water & Wastewater
